

Canoeing - Tejo I, Amieira-Alamal

Preparation guide | EN

Canoeing on a broad Tejo section, with cliffs along the banks and a finish in the Alamal River Beach area beneath Belver Castle.

Practical information

Route: Tagus descent finishing at Alamal River Beach, with Belver Castle in the landscape.

Programme: Programme arranged by proposal, adapted to river conditions and the group.

The experience

The open landscape and the castle backdrop distinguish this descent. The current can change with operation of Fratel dam, so the pace is not the same on every outing.

Programme and options

The proposal follows the Tejo section towards Alamal and includes a riverside break for food. The departure location and route length should be defined when preparing the programme, taking river flow into account.

What to bring

Bring food for the riverside break.

Requirements and preparation

The programme should account for the group's experience and fitness and the current on the day. A broad river setting is not a guarantee of no risk.

Preparing your visit

This guide summarises the admitted website information. It is not a booking confirmation or a commercial quotation. Arrange any missing equipment, collection/return details and conditions directly with the team.
